

# HBB02-E1

## BOE Blackbody Radiator

### Key Features

- Specially used for calibrating infrared thermometers and temperature cameras of various sizes.
- Excellent temperature uniformity on the calibration plane.
- By using intelligent temperature controller to achieve high accuracy.
- Fast temperature rise and fall.
- excellent performance with good price

## Specification

### Black-body Radiator

Temperature range	35~45°C
Effective emissivity	≥0.95
Temperature accuracy	0.1°C
Radiation surface	78mm x 78mm
Temperature stability	±0.15°C
Temperature uniformity	±0.2°C
Power supply	220V 50HZ
Outline dimension	240mm x 110mm x 150mm
Weight	1.5Kg
